SCRUM, Project Management, Power BI, Public Speaking, Bilingual (Vietnamese)

### **AWARDS**

2019	U-Spatial Mapping Competition
2018	Minnedemo 30 Presenter
2018	Holme's Center Biz Pitch Finalist
2017	tBRS Innovation Award Winner
2016	MD Visual Arts Competition Winner

# **WORK EXPERIENCES**

### **VOY AUDIO TOUR**

### SOFTWARE DEVELOPER

January 2018 - August 2019 I St. Paul, MN

- Lead team in developing full-stack AR platform to 300+ users
- Develop and test mobile application with Swift and XCode
- Design database and make REST API calls to AWS server
- Implement application and web analytics using GA and Firebase

#### **KIDBLOG**

### PRODUCT DEVELOPMENT INTERN

January 2018 - April 2018 I Minneapolis, MN

- Redesign company's core product used by 10000+ students
- Deliver complete redesign of over 50 artboards and widgets for company web application in 3 months
- Set and execute quarterly, weekly, and daily deliverables

#### **MEDTRONIC**

#### PROCESS IMPROVEMENT INTERN

June 2018 - August 2018 I Mounds View, MN

- Create 14-page guideline for Master Data access and perform data cleansing for 5 different product GTINs
- Interview 30+ planners for SAP tool usage data collection
- Visualize project report using Power BI and SAP tool

## TECHNICAL PROJECTS

### MACHINE LEARNING DIGIT RECOGNIZER

https://madebykiet.com/projects/digit\_recognizer

- Train model to recognize handwriting digit with TensorFlow using MNIST dataset I 87% accuracy
- Deploy model to production with Docker and AWS EC2, making API calls to query result
- Develop web interface using React, Node.js and Express.js

### **AUGMENTED REALITY AUDIO APP**

https://www.thevoyapp.com

- Develop iOS and Android application using Swift and Java that allows users to create geofenced audio recordings for tours
- · Perform digital signal processing using Apple's Audio Kit
- Make HTTP calls to AWS server to get user and tour data

### **SOCIAL CREDIT APP**

- Develop progressive web application using Dart and Flutter that uses social credit system to make meeting new people safe
- Make REST API calls to Google Cloud servers for user data
- Design user table and database implemented with Firebase
